

STUCK WITH SUBPAR NEEDLES? We've got a better option.

Introducing: Autopsy Needles

You told the LDI Innovation Lab dull needles lead to puncture injuries and you wanted a better needle ... so we delivered. LDI's double-curved, stainless steel autopsy needles are designed to remain sharp longer, and protect staff from sharps injuries during post mortem suturing of skin and tissue.

- > IDEAL FOR POST MORTEM SUTURING OF SKIN & TISSUE
- > DURABLE CONSTRUCTION REDUCES SHARPS RISKS ASSOCIATED WITH DULL NEEDLES
- > EASY TO THREAD

Specifications

PART	819-1	819-2
